

Ask the Audience Style Voting via Smartphone App

Name: Konstantinos Toliás
Supervisor: Bernhard Reus

'The student response systems and audience response keyboards'.

A 'TV or stereo remote control' which has buttons that the 'students can push to register their vote' to respond to multiple-choice questions which have been composed by their tutor. The results are 'displayed as a chart on the computer screen'. (Herreid, 2006, p. 44).

Best known from the TV show 'Who wants to be a millionaire?'

They are an interesting and alternative e-learning way to keep students engaged in lectures.

Implementing the web application and the Android application which are supported by:

- A server to provide the users with the appropriate services which they are requesting for
- A database to store all the data needed to provide these services.

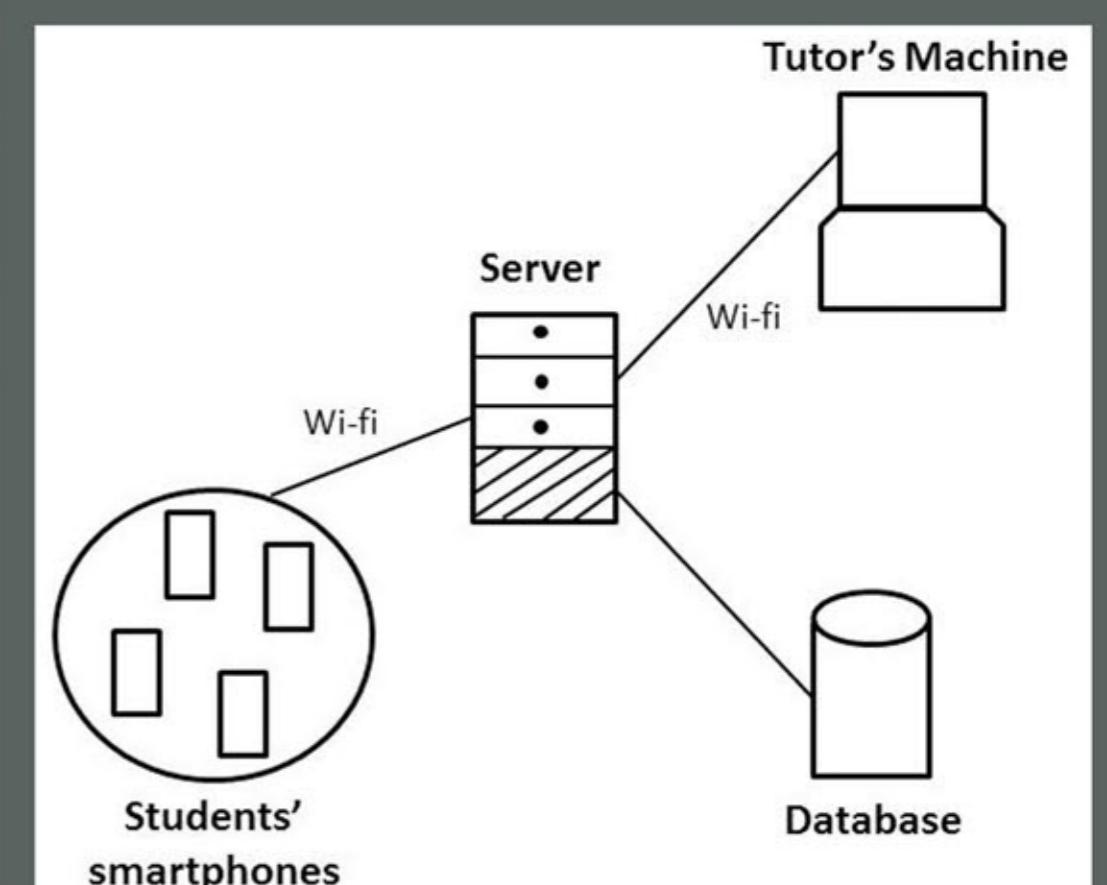

Figure 3: The connection between the different parts of the system

- To design a software system that applies the interactivity 'clickers' provide to Android smartphones.
- To add some extra features that are not available from the 'Turning point' system.

To provide clickers' users with a technology of the 21st century!

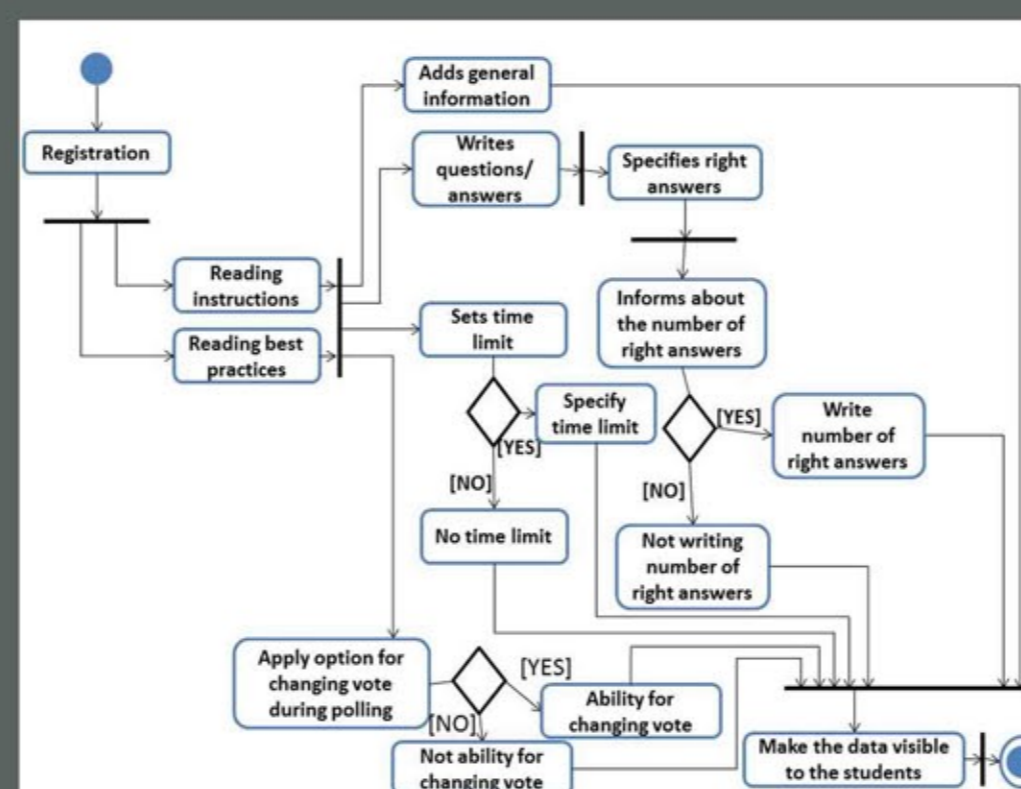

Figure 1: Activity diagram of tutor uploading information to the system

By creating a web application for the tutor to be able to:

- Compose questions & their respective answers
- Set time limit for the students to submit an answer
- Observe the polling in real time.
- View the final results of the current polling
- Search for results of previous pollings
- Inform the students for the number of the correct answers
- Apply the option for the students to change their answer before submitting it

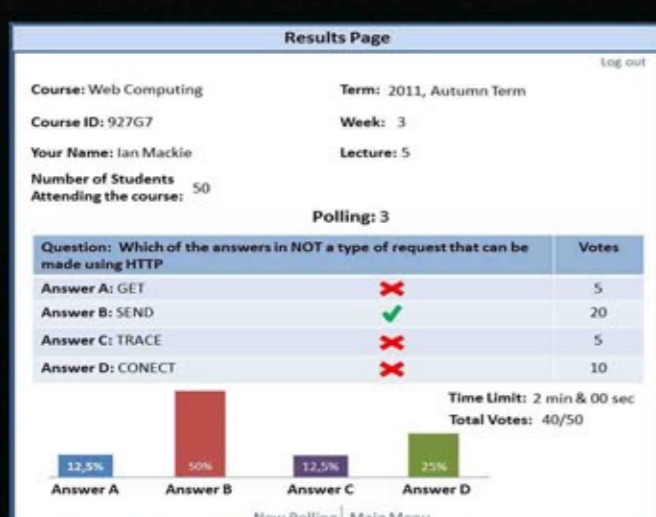

Figure 2: Prototype of the results page of the web application

By creating an Android app for the students to be able to:

- Respond to a polling by submitting an answer
- View the countdown to submit an answer for the question before the time expires
- To view the final general and personalized results of the current polling
- To search for the results of previous pollings
